

Direct Dispensing at the Point-of-Care

Or wherever you need it!

An Integrated Pharmacy Network

One centrally licensed pharmacy operation. Unstaffed dispensing endpoints at as many sites as you need. Providers supervise every dispense remotely over live video. The medication is in the patient's hand before they leave the building. Our system supports telehealth or in-person prescribing, remote supervision by licensed staff, and a full session audit—video, images, signature—for every dispense.

1

Prescribe

In person or by telehealth, inside your existing workflow.

2

Supervise

A provider reviews and approves each dispense on video.

3

Dispense

Labeled, counseled, and paid for in about 90 seconds.

Prepack Kiosk

Singulating Kiosk

Retail Pharmacy

The Gap In The Network

SITES WITHOUT A PHARMACY

Critical access, rural, and ambulatory locations can't justify staffed pharmacy hours, so patients leave with a prescription instead of a medication.

SCRIPTS THAT LEAVE THE SYSTEM

Discharge, after-hours, and telehealth prescriptions route to outside retail — breaking continuity of the record and the counseling standard.

A WIDENING LAST MILE

Retail closures keep increasing the distance between where your patients receive care and where they can fill it.

What It Means For The System

ADHERENCE

First fill captured at the point of care, before the patient has a chance not to pick it up

ACCESS

Pharmacy coverage at critical access sites without a pharmacist on site

CONTINUITY

Prescriptions stay inside the system — one record, one formulary, one counseling standard

WORKFORCE LEVERAGE

Existing pharmacists cover many locations instead of staffing each one

Where It Deploys

SITE	GAP IT CLOSES	RECOMMENDED UNIT
Clinic / FQHC	Dispense at the visit — no second trip	Both Kiosks
ED & Inpatient Discharge	Medications in hand before the patient leaves	Singulating Kiosk
Critical Access Hospital	Pharmacy hours without pharmacy staffing	Singulating Kiosk
Employee Health	A convenience benefit at low marginal cost	Prepack Kiosk
Ambulatory Campus	Full retail formulary, 3,000 SKUs, no staff	Retail Pharmacy
Urgent Care	High Volume, High use meds in hand at discharge	Both Kiosks
Integrated Healthcare Campus	Central, comprehensive medication coverage	Retail Pharmacy
